NMC — the four phases

KEEBRA PARK GRLA — YEAR 7 · HOW THE WORK PROGRESSES

20 weeks, four phases
Phase follows movement quality, not the calendar

PHASE 1 — ESTABLISH

WEEKS 1–5 · PATTERN AND MOTOR LEARNING

Bodyweight, on the floor, slow and deliberate. Learn the movement and the firing sequence.

1. **Supine Heel Slide Walkout**
   2 × 6 e/s
2. **Single Leg Glute Bridge**
   2 × 8 e/s
3. **Clamshell**
   2 × 10 e/s
4. **Prone Hip Extension**
   2 × 8 e/s
5. **Dead Bug**
   2 × 6 e/s
6. **Single Leg Balance**
   2 × 30 sec e/s

THIS BLOCK

PHASE 2 — LOAD

WEEKS 6–10 · LOAD AND VOLUME

Same patterns, now under resistance. Heavier bands, more reps and sets, tempo challenges.

1. **Banded Clamshell**
   2 × 12 e/s
2. **Banded Glute Bridge**
   2 × 12
3. **Lateral Band Walk**
   2 × 10 e/way
4. **Banded Standing Hip Abduction**
   2 × 12 e/s
5. **Banded Monster Walk**
   2 × 8 e/way
6. **Dead Bug with Band**
   2 × 8 e/s

PHASE 3 — INTEGRATE

WEEKS 11–15 · INSTABILITY AND COMPLEXITY

Functional positions, single-leg demand, unstable surfaces. The system holds under uncertainty.

1. **SL Glute Bridge, foot elevated**
   2 × 8 e/s
2. **Lateral Band Walk — low stance**
   2 × 12 e/way
3. **Single Leg Balance on foam pad**
   2 × 30 sec e/s
4. **SL RDL Reach (dowel)**
   2 × 6 e/s
5. **Copenhagen Plank, bent knee**
   2 × 20 sec e/s
6. **Pallof Press**
   2 × 8 e/s

PHASE 4 — EXPRESS

WEEKS 16–20 · VELOCITY AND REACTIVE DEMAND

Sport speed, reactive cues, maximum voluntary contraction. Move with full effort.

1. **Lateral Band Walk — fast**
   2 × 15 e/way
2. **Pallof Press (Perturbations)**
   2 × 8 e/s
3. **Single Leg Balance + partner taps**
   2 × 20 sec e/s
4. **Depth Drop to Stick (low box)**
   2 × 5
5. **Reactive SL Hop & Stick (coach call)**
   2 × 4 e/s
6. **Pallof Press (Partner)**
   2 × 10 e/s

THE SAME QUALITY, TRAINED FOUR WAYS

read each row left to right — this is what "progression" means here

QUALITY	PHASE 1 — ESTABLISH	PHASE 2 — LOAD	PHASE 3 — INTEGRATE	PHASE 4 — EXPRESS
Glute med · the Q-angle line	1 Clamshell	2 Banded Clamshell	3 Lateral Band Walk — low stance	4 Lateral Band Walk — fast
Glute max · hip extension	1 Single Leg Glute Bridge	2 Banded Glute Bridge	3 SL Glute Bridge, foot elevated	4 Depth Drop to Stick
Balance · proprioception	1 Single Leg Balance	2 Banded Monster Walk	3 Single Leg Balance on foam pad	4 Single Leg Balance + partner taps
Trunk · anti-extension to anti-rotation	1 Dead Bug	2 Dead Bug with Band	3 Pallof Press	4 Pallof Press (Perturbations)

MOVING A GROUP UP A PHASE

An athlete moves up when she is **controlled and stable** at the phase she is in — knee tracking over the second toe, pelvis level, quality holding when she is tired. Not when five weeks have passed. Two athletes in the same session can be in different phases, and often should be. The spine (Box Step-Down, Jump & Stick, Neck Iso) does not change: it runs at every phase, every session.

Equipment: bands (light/medium/heavy) · low box 15–35 cm · foam pad (Phase 3–4)

CARE · ACCOUNTABILITY · RESPECT · EXCELLENCE
